**Sterling battery to battery charger + 350W solar controller**

**BBS1230**

- Sterling's range of battery to battery chargers (b2bs) has grown significantly over the past few years. this is in an effort to supplement the ever growing demand from the commercial vehicle, recreational vehicle and marine industries. The B2B's have become extremely popular as they fast charge batteries as you cruise along without the need for complex wiring, touching your alternator, voiding the alternator's warranty and tampering with the electronic control units (ecus).
- 12v 30a specification
- Easily install LED with no complicated wiring
- 1a back feed to maintain starter battery
- 3 stage battery charging program

**Sterling Battery to battery 60 amp charger**

**BB1260**

- Fast charge batteries as you cruise along without the need for complex wiring, touching your alternator, voiding the alternator's warranty and tampering with the electronic control units (ecus)

**Sterling Battery to battery 30 amp charger**

**BB1230**

- 12v 30a and 3 stage battery charging program
- Easily install with no complicated wiring
- Default mode complements regenerative braking and does not require ignition feed and additional modes with ignition feed and timer

**Sargent 20A DC-DC 3 Stage Battery Charger**

**DX320-12**

- Power 260w
- Input voltage range 10.5 - 15.4v
- Output voltage range 8 - 16v
- Output current 20a (max)
- Standby current 17ma (max)

**Sargent 2 Stage 192w Battery Charger**

We at Miriad Quest Leisure have teamed up with Platinum International and the implementation of the NCC verified battery scheme shows you why. Platinum have one of the largest selection of NCC verified battery ranges available from any manufacturer.

This means that you can get any battery, for any purpose from one single supplier, making it easier than ever before.

**PLATINUM**  
INTERNATIONAL

## NCC VERIFIED

The National Caravan Council (NCC) was setup over 70 years ago as the UK trade body representing the collective interests of the touring, Motorhome, holiday home and park home sectors.

The scheme provides product verification for batteries used in leisure vehicles. With modern leisure

vehicles featuring more technology and electrical appliances than ever before, buying an NCC verified leisure battery will give you confidence that the battery purchased is fit for purpose and will perform as advertised. The batteries will be verified and labelled accordingly into three categories, A, B and

C, depending on their category & purpose. The NCC don't verify or test batteries designed for RVs.

Used in conjunction with the NCC Scheme supports the style of selecting the battery based on the users usage requirements below:

## CLASSIFICATIONS

**Class A** is for batteries with a higher storage capacity, for people who frequently use their caravans or motorhomes away from electrical hook-ups and require high power to operate devices such as microwaves and motor movers. Class A verified batteries typically have 10x more cycles than a Class C Battery.

**Intended Purpose:**

Frequently used without electrical hook-up.

**Note:** For motorhomes with higher power consumption but still generally used without electrical hook-up, it may be more practical to use multiple batteries from class A.

**Class B** batteries are aimed at those who frequently use sites with hook-up facilities, but require a greater battery capacity to operate TVs and other devices. Class B verified batteries typically have 3x more cycles than a Class C Battery.

**Intended Purpose:**

For use with electrical hook-up with minimal off-grid habitation usage e.g. Lights, TV plus motor mover

**Class C** is for users that require a lower capacity battery to cover basic operation of their habitation equipment for short periods away from a hook-up.

**Intended Purpose:**

For use with electrical hook-up with minimal off-grid usage e.g. Lights

## PLATINUM LEISURE AGM PLUS

### FEATURES

- DESIGNED TO COPE WITH THE ARDUOUS DEMANDS PLACED ON THE BATTERY BY THE MOTOR MOVER.
- ADVANCED PLATE DESIGN WHICH GIVES HIGH RESISTANCE TO CORROSION AND REDUCES SELF DISCHARGE, SO OFFERS GREATER STORAGE TIME
- ABSORBED GLASS MAT SEPARATORS WHICH INCREASE CYCLIC CAPABILITY ALLOWING THE BATTERY TO BE DISCHARGED AND RECHARGED OVER 360 TIMES, RESULTING IN LONGER SERVICE LIFE
- SEALED CONSTRUCTION WHICH ENSURES NO ELECTROLYTE LEAKAGE FROM TERMINALS OR CASE. THIS ALLOWS FITMENTS IN ANY ORIENTATION
- SEALED LOW-BOX - IDEAL WHERE THE FITMENT LOCATION OF THE BATTERY IS RESTRICTED

Specifically  
Designed for

## PLATINUM VRLA

### FEATURES

- THE VRLA RANGE IS NOT ONLY USED AS BACK UP POWER, IT IS IN FACT USED IN A NUMBER OF APPLICATIONS WHERE IT IS THE ONLY POWER SOURCE, THEREFORE DURABILITY AND RELIABILITY ARE A GIVEN.
- THE PLATINUM VRLA RANGE OF BATTERIES IS IDEAL WHEN 'OFF GRID' POWER IS REQUIRED ON A FREQUENT BASIS.

## ENGINE STARTER

As this is a starter battery, used for Motorhomes, it does not have a National Caravan Council classification.

## PLATINUM MOTORHOME

### FEATURES

- 30% EXTRA POWER - PERFECT FOR ENGINE STARTING AND RUNNING ELECTRICAL APPLIANCES
- S O C I (STATE OF CHARGE INDICATOR) - USES COLOURS TO INDICATE THE CHARGE OF THE BATTERY
- ABSORBED GLASS MAT SEPARATORS - INCREASES CYCLIC CAPABILITY ALLOWING THE BATTERY TO BE DISCHARGED AND RECHARGED MORE, RESULTING IN LONGER SERVICE LIFE
- SEALED CONSTRUCTION - UNIQUE CONSTRUCTION ENSURES NO ELECTROLYTE LEAKAGE FROM TERMINALS OR CASE. THIS ALLOWS FITMENTS IN ANY ORIENTATION
- GAS RECOMBINATION - RECOMBINES ANY GASSES CREATED DURING NORMAL USAGE, TOTALLY MAINTENANCE FREE
- SEALED LOW-BOX - IDEAL WHERE THE FITMENT LOCATION OF THE BATTERY IS RESTRICTED

## Rigid high density solar panel kits Aero brackets

**STPUMH100AE : 100 W**      **STPUMH150AE : 150 W**  
**STPUMH125AE : 125 W**      **STPUMH200AE : 200 W**

- Includes everything needed to install the panel and comes complete with premium aero brackets, PWM charge controller, cable gland, elastic adhesive and user manual
- Power ratings up to 200W
- Continuous trickle feed of power to prevent battery drain
- Creates energy self-sufficiency for off-grid travel
- All PV Logic MPPT charge controllers come with free-to-download Bluetooth app, to display how the solar system is performing

## Fold up solar panels

**STFP08 : 8 W**      **STFFP120: 120 W**  
**STFFP90: 90 W**

- Quick and easy to use
- Each panel has its own integrated stand, charge controller and battery
- Just open up and connect to a battery for instant power
- 90 and 120 Watt panel includes 10A in-line PWM

## Flexi high density solar panel kits

**STPVFURT110PT: 110 W**

- The roof and deck top kit comes with all you need to install a panel. With power ratings up to 290W, our MHD solar panels fulfil a variety of energy needs ranging from a continuous trickle feed of power to prevent battery drain in caravans.
- The 10A charge controller supplied in the kit protects the battery from being overcharged and to prevent reverse current drain.

## Flexi high density solar panel - rear exit

**STPVFU290R: 290 W**

- The 290w MHD Flexi solar panel combines shingled monocrystalline solar cells to deliver super efficient power generation with a tough ETFE top sheet for longevity and robust impact resistance
- At just 2mm thick, this ultra-lightweight panel is ideal for flat roofs as well as surfaces with a slight curve making it the perfect choice for camper vans and boat decks.

*Please note, this product is the panel only, not a full kit.*

## Dometic T2500H 2kw petrol generator

9102900005

260 x 200 x 320 mm

- 230 V AC – just like at home
- Extra 12 V output for battery charging
- 2000 W continuous output
- 2200 W peak output
- Remote control included
- Sound-dampened stainless steel cabinet

## Dometic TEC29 2600w continuous Gnerator

9102900299

44 kg

- Petrol-fuel LED engine
- modest energy consumption
- Very quiet running
- Suitable as a power source for all dometic air conditioners
- Includes 5m extension cable and change over switch.

## Dometic AG101 15L fuel tank

9102900009

260 x 200 x 320 mm

- 15 litre, plastic fuel tank
- Weight: 2.5kg

## Dometic TEC29 generator fuel tank

9102900010

- Accessory for Dometic generators
- Comes complete with supports and integrated feed mouth for convenient filling

## Dometic AG102 changeover valve

9102900013

- Dometic AG102 change over relay to suit T2500/TEC29/TEC30

BY LIPPERT

## Polyvision windows

### Principal product features & competitive benefits :

#### FRAME

- One-piece aluminium, with integrated hinge profile and thermal insulation

#### SEALING RUBBER

- Supple, frost proof compound that seals directly onto the acrylic (no hinge step to cope with).

#### ACRYLIC

- Cast 3mm acrylic, not thinner and extruded.

#### LIGHTWEIGHT CONSTRUCTION

- Typically only 0.3kg heavier than a 4.26 window and approx 2kg lighter than a plastic framed version (based on a 900x550 unit).

#### INCREASED VISIBILITY

- Lack of blind infringement into aperture giving increased clear field of vision (enabling smaller aperture sizes to be used, less weight and cost).

- Fixed by adding material (glue), not by routing and removing material.

#### EASE OF FITTING

- Off line preparation needed.
- Removal of the 'human element' of rubber windows.
- Quicker to fit; fully assembled.

#### ALSO TO CONSIDER

- Timberless aperture possibilities.
- Automated sealant application.
- Decreased inventory of parts ie, fully assembled.
- Direct interchange with aperture for non framed windows; standardisation of side manufacture.

### Roxlite® Acrylic features

- Shockproof
- Lightweight
- Thermo formable
- Excellent transparency
- Stronger than glass (due to molecule structure)
- Chemical resistant
- UV transmitting
- Easy to work with (cut and drill)

## Horrex DuoPliss UCS blinds Cream

- Thanks to its innovative design, UCS is the most compact and quick to mount window blind system on the market. The modular system enables us to quickly tailor it to our customers' needs to easily fit any interior. The attractive and practical design has a solid construction that ensures noise-free and hassle-free use. This is particularly important when driving a motorhome.
- The shade fabric (blackout) consists of 4 layers ensuring no light gets through and long durability. The mesh is made of high-quality polyester that provides excellent airflow and durability after pleating.
- Both the blackout fabric and the mesh are available in a fire retardant version.
- Available in various sizes (shown below) and in cream and white
- Also available a specific version for the rear window on a Ducato van with polyplastic windows (as listed below)
