THE QUEST FALCON & SCREEN HOUSE

FALCON - SERIES

The **Falcon series** from Quest is a comprehensive range of lightweight awnings designed for caravans, motorhomes, camper vans, cars and more. Renowned for their exceptionally low weight and intelligent design, Falcon awnings are among the lightest and easiest to use on the market, with many models easily set up by a single person.

The range includes the Falcon Pro Air collection, offering the added convenience and speed of air technology, alongside the Falcon Poled range for those seeking a traditional, non-air solution that delivers outstanding value for money.

The Falcon`Pro Air range features the new and improved Quest Tec150 fabric, carefully engineered to provide the ideal balance between weight and performance. Its latest generation coating delivers excellent UV stability and a hydrostatic head of 6,000mm, ensuring reliable protection in varied conditions.

The Falcon Poled range uses the incredibly lightweight Quest Tec75 fabric. Despite its minimal weight, it offers impressive weather protection, with a waterproof rating of 5,000mm hydrostatic head and a UV rating of 50+, keeping you well protected from both rain and sun.

SCREEN HOUSE - SERIES

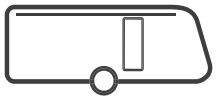

The Screen House series of shelters from Quest are the original, and the best quick-pitch shelters on the market. Designed for effortless use, the Screen House can be set up by a single person in around one minute. There is simply no easier shelter to pitch.

As the first shelter to feature Quest's innovative hub system, the Screen House has been continually refined over the years. These improvements have made it not only exceptionally easy to use, but also highly durable, ensuring reliable performance season after season.

The original Screen House range has since been expanded with the Screen House PRO. Building on the original design, the PRO includes additional panels for increased protection from the elements, along with the option to add a canopy, vehicle connector or wind shield directly to your shelter. For larger setups, multiple Screen House 6 PRO models can even be zipped together.
